

Component # 3: Social Skills Outings

The Social Skills Outings are an important segment of our LIGHTHOUSE 2911 Program. All of the features of the LIGHTHOUSE 2911 Program prepare our youth for these social skills activities. During these trips we expose the participants to new and positive life experiences. While participating in the social skills activities our youth are required to apply the new skills they have learned through the Life Skills Program. They get to “practice” their new behavior and relationship skills. The participants are also given a real live opportunity to “experience” a world beyond the limited world most of them know. These social skills activities, along with the previous Life Skills training, help the youth bridge the gap between a limited and often unsuccessful world into a world that will offer them a more successful future.
